Purpose

This document was developed to outline the broad scope of practice of nurse practitioners in Alberta while delineating the boundaries of that practice. The Scope of Practice for Nurse Practitioners is not a standalone document; it is a companion document to:

- Practice Standards for Regulated Members (2013)
- Entry-Level Competencies for Nurse Practitioners in Canada (2016)
- Prescribing Standards for Nurse Practitioners (2017)

This document is also to be used with other documents including:

- Health Professions Act: Standards for Registered Nurses in the Performance of Restricted Activities (2005)
- Code of Ethics for Registered Nurses (2017)
- Privacy and Management of Health Information: Standards for CARNAs Regulated Members (2011)
- Documentation Standards for Regulated Members (2013)
- Medical Assistance in Dying Standards of Practice for Nurse Practitioners (Alberta. Minister of Health, 2016)
- Medical Assistance in Dying Guidelines for Nurse Practitioners (2017)
- Scope of Practice for Registered Nurses (2011)
- Standards for the Supervision of Nursing Students and Undergraduate Nursing Employees Providing Client Care (2005)

Role and Requirements

The College and Association of Registered Nurses of Alberta (CARNA), as the regulatory body and professional association, has the responsibility of setting the entry to practice competencies, standards of practice and requirements for licensure for nurse practitioners. The education and experience of nurse practitioners allows them to function independently and collaboratively across the care continuum (Canadian Nurses Association [CNA], 2009). Nurse practitioners, as autonomous and independent health
professionals, provide essential health services grounded in the registered nurse profession’s values, knowledge, theories and practice. They are health profession members of interdisciplinary, collaborative professional health care teams and consult with, refer to and are consulted by physicians and other health care providers.

The nurse practitioner role requires advanced knowledge and decision making skills gained through further clinical practice, education and experience that enables them to perform additional interventions that are not considered part of the registered nurse scope of practice (CNA, 2009). Nurse practitioners have the competencies to conduct a comprehensive health assessment, diagnose health/illness conditions and treat and manage acute and chronic illness within a holistic model of care. Nurse practitioners order and interpret screening and diagnostic tests, perform procedures and prescribe medications and therapeutic interventions, while integrating the principles of resource allocation and cost-effectiveness, in accordance with federal, provincial and territorial legislation and policy (Carna, 2016).

The professional role, accountability and responsibilities of the nurse practitioner include clinical practice, collaboration, consultation and referral, research and leadership. This document will focus primarily on that of the clinical role of nurse practitioners.

Legislated Scope of Practice

In Alberta, the authority for the regulation of nurse practitioners is included in the Registered Nurses Profession Regulation pursuant to the Health Professions Act (HPA) (2000). Refer to Appendix A for sections of the regulation that are pertinent to nurse practitioners. Under HPA, the titles ‘nurse practitioner’ and ‘graduate nurse practitioner’ and the initials ‘NP’ and ‘GNP’ are protected titles and can only be used by a regulated member on the nurse practitioner register.

Nurse practitioners are registered nurses and, as such, the practice statement in HPA for registered nurses (refer to Appendix B) in Alberta also applies to nurse practitioners. The Registered Nurses Profession Regulation authorizes nurse practitioners to perform all of the restricted activities that registered nurses perform and identifies additional restricted activities that are authorized specifically as part of the scope of practice of nurse practitioners.

The legislated scope of practice for nurse practitioners refers to those activities that nurse practitioners are educated, authorized and competent to perform. The scope of practice is established through legislated statements of registered nurse and nurse practitioner practice; complemented by standards, guidelines and policy positions issued by professional nursing bodies (Carna, 2016). Nurse practitioners are required to
practice in accordance with all the standards relevant to the nursing profession in Alberta.

**Restricted Activities**

Nurse practitioners are authorized to perform all of the restricted activities of registered nurses. The following restricted activities are specific to nurse practitioner scope of practice:

- prescribe a Schedule 1 drug within the meaning of the *Pharmaceutical Profession Act*
- prescribe blood products
- order and apply any form of ionizing radiation in medical radiography
- order any form of ionizing radiation in nuclear medicine
- order non-ionizing radiation in magnetic resonance imaging
- order or apply non-ionizing radiation in ultrasound imaging, including any application of ultrasound to a fetus
- prescribe diagnostic imaging contrast agents
- prescribe radiopharmaceuticals, radiolabelled substances, radioactive gases and radioaerosols

The authority to prescribe drugs and substances includes prescribing of parenteral nutrition.

Although CARN A authorizes nurse practitioners to perform these restricted activities, through regulation, this does not mean that a nurse practitioner is authorized to perform any restricted activity in any situation in any practice setting. Nurse practitioners must refer to *Health Professions Act: Standards for the Performance of Restricted Activities* (2005) for direction and expectations related to the performance of restricted activities.

**Impact of Federal and Provincial Legislation**

Nurse practitioners practice within their legislated scope of practice, as well as all relevant legislation. Despite nurse practitioner competence and authorization under the HPA, some provincial and federal legislation does not recognize nurse practitioners as authorized providers with designated authority to perform certain activities.
Nurse practitioners have a responsibility to be aware of legislation that impacts their scope of practice and adhere to it in practice. This includes, but is not limited to:

- the federal Food and Drugs Act and Regulation
- the federal Controlled Drugs and Substances Act (CDSA) and Regulation
- the Hospitals Act specific to admitting, treating and discharging clients
- the Government Organization Act related to supervision of non-regulated persons
- the Protection for Persons in Care Act that is designed to promote the prevention of abuse of adults who receive government-funded care or support services

CARN A registers nurse practitioners in one of three categories, referred to as streams of practice: Family/All Ages, Adult, Child, and Child with a Neonatal Specialty.

Nurse practitioners apply theory and knowledge from nursing and other disciplines to provide a comprehensive range of health services within their stream of practice, grounded in professional, ethical and legal standards and within a holistic model of care (CARNA, 2016). Nurse practitioners may serve as the primary care provider to individuals and/or families, as appropriate within their practice setting and stream of practice.

**Family/All Ages**

The nurse practitioner in the Family/All Ages category provides health services across the lifespan, including newborns, infants, children, adolescents, adults, pregnant and postpartum women and older adults. The nurse practitioner (Family/All Ages) is prepared as a generalist for practice that is usually community-based, including but not limited to:

- remote areas
- family practice
- primary care networks
- outpatient clinics
- urgent care
- emergency departments
Adult

The nurse practitioner in the Adult category provides health services to young, middle-aged and older adults in either a generalized adult practice where they see adults with a variety of medical conditions or adults with health conditions in a specialized area of practice. The nurse practitioner (Adult) has in-depth knowledge of adult acute and chronic illness and can work with complex clients.

In some instances, older adolescent care may be provided by an adult nurse practitioner, when the adolescent’s developmental age and/or lifestyle may more closely approximate that of an adult. Practice settings include:

- acute care
- continuing care
- community settings

Child

The nurse practitioner in the Child category typically provides health services for individuals under the age of 18 years (newborns, infants, toddlers, school-age children and adolescents) in either a generalized child health setting where they provide care for healthy children, as well as those who have a variety of medical conditions, or with children with health needs that require specialized care.

In some instances, the nurse practitioner (Child) may provide care to young adults whose developmental age may closely approximate that of a child or adolescent rather than that of an adult, or a young adult who has been receiving care from the nurse practitioner for a chronic disease since childhood, during transition to the care of an adult practitioner.

Child (Neonatal Specialty)

Neonatal nurse practitioners are registered in the Child category and have specialized education relevant to neonatology which includes the complex management, resuscitation and stabilization of extremely premature and critically ill neonates. Practice settings include high risk newborn centers as well as Level 2 and 3 neonatal intensive care units. They are restricted to working with the neonate population.
Nurse practitioners are essential members of the interdisciplinary team who have advanced education and provide a full range of comprehensive health services to individuals across their lifespan. Nurse practitioners practicing in Alberta have a broad autonomous and independent scope of practice, and are accountable and responsible for their own practice.

Carna Policies for Nurse Practitioners

Nurse practitioners must understand and apply CARNA standards, guidelines and policies to their practice. It is the inherent responsibility of the individual nurse practitioner to keep abreast of any changes to CARNA standards, guidelines and policies that may impact nurse practitioner practice. The CARNA Scope of Practice for Registered Nurses (2011) is foundational to the nurse practitioner scope of practice. Nurse practitioners must understand the registered nurse legislated scope of practice to understand their own scope of practice.

In addition to the registered nurse scope of practice, the nurse practitioner scope of practice includes:

- advanced health assessment
- diagnosis
- ordering and interpreting diagnostic tests
- prescribing pharmacotherapy
- treatment and advanced interventions
- monitoring client outcomes
- follow-up care
- consultation and referral as required

Advanced Health Assessment and Diagnosis

Nurse practitioners have the competencies to provide comprehensive health assessment and diagnose health conditions and illness (acute illness/injuries and chronic diseases, comorbidities and emergency health needs) and discuss diagnoses, prognoses, treatments and outcomes with clients. There are no restrictions in Alberta legislation on nurse practitioner authority in assessing, diagnosing and treating client health conditions.
Diagnostic Tests

Nurse practitioners are authorized to order and/or perform screening and diagnostic investigations using best available evidence to support or rule out differential diagnosis. Lists of treatments and diagnostic/laboratory tests are not specifically outlined; rather nurse practitioners have a broad scope of practice, autonomy and independence to determine the appropriate diagnostic tests for their clients, within the individual nurse practitioner’s level of competence.

Prescribing Pharmacotherapy

Nurse practitioners in Alberta have the authority to prescribe drugs and substances. This authority arises from the interplay between various provincial and federal statutes. Paragraph 15 (5)(a) of the Registered Nurses Profession Regulation (2005) under the Health Professions Act (HPA) (2000) provides that nurse practitioners may prescribe a Schedule 1 drug as defined by the Pharmacy and Drug Act (PDA) (2000).

Schedule 1 of the PDA includes those drugs and substances regulated federally by the Controlled Drugs and Substances Act (CDSA) (1996) and the Food and Drugs Act (FDA) (1985), and other drugs and substances designated as a Schedule 1 drug or substance pursuant to the PDA. By virtue of these statutes, including the New Classes of Practitioners Regulations (NCPR) (2012) under the CDSA, nurse practitioners have the legislative authority to prescribe drugs and substances from the following sources:

- Prescription Drug List (maintained by Health Canada pursuant to section 29.[1] of the FDA)
- Schedule to Part G of the Food and Drug Regulations (a regulation made pursuant to the FDA), except item 1 of Part III but including sub item (40)
- Schedule to the Narcotic Control Regulations (a regulation made pursuant to the CDSA), except sub items 1(1) and 2(1)
- Schedule 1 to the Benzodiazepines and Other Targeted Substance Regulations (a regulation made pursuant to the CDSA)
- Other substances listed as Schedule 1 drugs in the Scheduled Drugs Regulation under the PDA

In accordance with the federal Food and Drugs Act and Regulation, only physicians, dentists, veterinary surgeons and pharmacists have the authority to accept drug samples. At this time, nurse practitioners do not have this authority. Nurse practitioners are authorized prescribers and they can dispense samples of drugs they have
prescribed, if available in the practice setting. Dispensing of the prescribed sample medication must be in accordance with the Alberta College of Pharmacists’ (ACP) dispensing standard.

**Treatment/Advanced Interventions**

Nurse practitioners are authorized to perform both invasive and non-invasive procedures integral to the clinical management of clients, determined by the competence of the individual nurse practitioner. These may include but are not limited to suturing, incision and drainage, excisions, intubation, limb immobilization and casting and reducing dislocation of joints.

**Monitoring Client Outcomes**

Nurse practitioners collaborate with clients in monitoring their response to therapeutic interventions and adjusting interventions as needed to address health care needs in the provision of initial and ongoing care.

**Consultation and Referral**

Nurse practitioners consult and refer to another health care provider when the client’s condition warrants it. Referral to another health care provider (e.g., physiotherapist, another nurse practitioner, physician) is required when the nurse practitioner approaches or reaches the limits of their competence beyond which they cannot provide care independently and additional information or assistance is required. Nurse practitioners are also consulted by other health care providers, including physicians, when the nurse practitioner is the most appropriate care provider. The nurse practitioner is accountable for identifying when collaboration, consultation, and referral are necessary for safe, competent, and comprehensive client care.

**Impacts/Influences on Individual Nurse Practitioner Scope of Practice**

Factors that influence the scope of practice of the individual nurse practitioner include:

- the nurse practitioner’s individual competencies
- the practice setting and client population
- agency/employer policies
- legislation that does not identify the nurse practitioner as a care provider
Competence

Recent nurse practitioner graduates gain proficiency in the breadth and depth of their practice over time with continued education and professional development support from employers, other nurse practitioners, physicians and other health team members (CNA, 2010). Individual nurse practitioners need to assess their level of competence and maintain their competence on an ongoing basis. Nurse practitioners are required to engage in CARNA’s Continuing Competence Program (CCP).

Practice Setting, Client Population and Client Need

Nurse practitioners can provide comprehensive primary health care services that include:

- health promotion
- illness and injury prevention
- curative, rehabilitative and supportive services

...to clients in all practice environments with diverse populations where there is a client or population need, including but not limited to community¹, acute care, continuing care and occupational health.

Carna Policy and Practice Consultants should be contacted at (780) 451-0043 or 1-800-252-9392 (Canada-wide) or by email at practice@nurses.ab.ca for any questions related to nurse practitioner scope of practice.

¹ The word “community” here includes remote, rural and urban areas.

Appendix A: Regulations Specific to Nurse Practitioners

Definitions

1 In this Regulation,
   (j) “nurse practitioner register” means the nurse practitioner category of the regulated members register;

Register categories

2 The regulated members register established by the Council under section 33(1)(a) of the Act has the following categories:
   (b) nurse practitioner register;

Registration

Nurse Practitioner Register

4(1) An applicant for registration as a regulated member on the nurse practitioner register must
   (a) have successfully completed a baccalaureate degree in nursing satisfactory to the Registration Committee,
   (b) have completed 4500 hours of registered nursing practice satisfactory to the Registration Committee,
   (c) have successfully completed a nurse practitioner education program approved by the Council,
   (d) be registered on the registered nurse register, and
   (e) have passed any examination respecting nurse practitioner practice approved by the Council.
2) Despite subsection (1), an applicant who does not meet the requirements of subsection (1)(a) or (c) or subsection (1)(a) and (c) may be registered as a regulated member on the nurse practitioner register if the applicant

   (a) provides evidence satisfactory to the Registration Committee that the applicant has education and experience that is substantially equivalent to the requirements of subsection (1)(a) or (c) or subsection (1)(a) and (c),

   (b) has, in the opinion of the Registration Committee, sufficient knowledge, skill and experience to practise as a nurse practitioner, and

   (c) has met the requirements of subsection (1)(b), (d) and (e).

(3) In determining whether or not an applicant’s qualifications are substantially equivalent under subsection (2) and whether the applicant has sufficient knowledge, skill and experience, the Registrar may require the applicant to undergo examinations, testing and assessment activities to assist with the determination.

(4) The Registrar may direct the applicant to undergo any education or training activities the Registrar may consider necessary in order for the applicant to be registered on the nurse practitioner register.

(5) The Council may limit the number of times that an applicant may attempt to pass a nurse practitioner exam approved by the Council under subsection (1)(e).

** Courtesy Registration **

7(1) A registered nurse or nurse practitioner in good standing in another jurisdiction recognized by the Council who requires registration in Alberta on a temporary basis for a specified purpose approved by the Registrar and who satisfies the Registrar of having competence to provide the services related to the specified purpose is eligible for registration on the courtesy register.

** Titles and Abbreviations **

** Authorization to use titles, etc. **

14(4) A regulated member registered on the nurse practitioner register may use the title nurse practitioner and the initials NP.
RESTRICTED ACTIVITIES

AUTHORIZED RESTRICTED ACTIVITIES

15(5) A regulated member on the nurse practitioner register may, within the practice of registered nursing, perform the restricted activities listed in subsection (1) and the following additional restricted activities when practising as a nurse practitioner:

(a) to prescribe a Schedule 1 drug within the meaning of the *Pharmaceutical Profession Act*;²

(b) to prescribe parenteral nutrition;

(c) to prescribe blood products;

(d) to order and apply any form of ionizing radiation in medical radiography;

(e) to order any form of ionizing radiation in nuclear medicine;

(f) to order non-ionizing radiation in magnetic resonance imaging;

(g) to order or apply non-ionizing radiation in ultrasound imaging, including any application of ultrasound to a fetus;

(h) to prescribe diagnostic imaging contrast agents;

(i) to prescribe radiopharmaceuticals, radiolabelled substances, radioactive gases and radioaerosols.

STUDENTS

17(4) A regulated member who is on the registered nurse register and is enrolled in a nurse practitioner education program approved by the Council is permitted to perform the restricted activities referred to in section 15(5) as part of the clinical practicum of the nurse practitioner education program if the regulated member is under the supervision of a regulated member who is authorized to perform those restricted activities.

² Currently titled *Pharmacy and Drug Act*
(5) A student in a nurse practitioner education program outside Alberta is permitted to perform the restricted activities set out in section 15(5) in a clinical practicum in Alberta, if the student

(a) is registered on the registered nurse register,

(b) has visiting student status in a nurse practitioner education program approved by the Council, and

(c) is supervised by a regulated member authorized to perform those restricted activities.

**Practice Permit**

**Renewal Requirements**

21(3) A regulated member who is a nurse practitioner must, in addition to the requirements of subsection (1), provide evidence satisfactory to the Registrar of 600 hours of nurse practitioner practice within the previous 2 membership years.

(4) Despite subsection (3), a nurse practitioner who does not meet the requirements of subsection (3) may instead meet any other requirements, as determined by the Registration Committee.
Appendix B: Health Professions Act RN Practice Statement

Under Schedule 24, Section 3, of the Health Professions Act, the practice statement for the profession of registered nurses is:

In their practice, registered nurses do one or more of the following:

(a) based on an ethic of caring and the goals and circumstances of those receiving nursing services, registered nurses apply nursing knowledge, skill and judgment to:
   (i) assist individuals, families, groups and communities to achieve their optimal physical, emotional, mental and spiritual health and well-being.
   (ii) assess, diagnose and provide treatment and interventions and make referrals,
   (iii) prevent or treat injury and illness,
   (iv) teach, counsel and advocate to enhance health and well-being,
   (v) coordinate, supervise, monitor and evaluate the provision of health services,
   (vi) teach nursing theory and practice,
   (vii) manage, administer and allocate resources related to health services, and
   (viii) engage in research related to health and the practice of nursing, and

(b) provide restricted activities authorized by the regulations.
Appendix C: Schedule of Drugs

The Pharmaceutical Schedule 1 Drugs can be accessed at the Alberta College of Pharmacist website (www.pharmacists.ab.ca) or at this link: https://pharmacists.ab.ca/nPharmacistResources/ABDrugSchedules.aspx.

For all Drug Schedules - national drug schedules (NDS) information can be assessed at the National Association of Pharmacy Regulatory Authorities website at this link: http://napra.ca/pages/Schedules/Search.aspx.
